

Real-Time Economy Innovations For Europe

9-10 April 2015 | Helsinki, Finland

Real-Time Economy (RTE) Innovations for Europe is a two-day conference probing into the future of financial processes. The overriding theme for the conference is the need to improve the existing infrastructures and innovative new ecosystems in the financial administration area.

The event presents the latest developments in the areas of real-time accounting, XBRL-based government reporting, COREP-reporting, e-identification, mobile financial services, and innovative services for the banking sector.

The event is organized into nine roundtable sessions in three tracks: New age of financial reporting, public sector services and real-time accounting.

Date: 9.-10.4.2015

Venue: Aalto University School of Business, Chydenia, Runeberginkatu 22-24.

Registration fee €200 (free of charge for XBRL Finland consortium members)

Registration: <https://eage.aalto.fi/?fs/en/RTE>
