Value-add Applications/Re-usability based on digital infrastructure

Benefits are welcome and needed

Public

- For the people
- Corporates
 - Small-medium
 - Domestic
 - Export
- Society

...but does good look the same in different eyes

Different views can be based on geography....

"My country"

"Me and neighbours"

"My community"

...or different segments

- It don't need to be conflict, but the needs and point of view are different

Opportunities and examples

- Interoperability and re-usability can be achieved through
 - Co-operation
 - Common rules
 - Standards
- Telecommunication
- Data communication
- SEPA
- "e-invoicing"
 - CEN 434 defining content model
- ""VAT""
 - Invoice tax reporting
- Accounting

...but

Public

Are we moving fast enough?

Or does countries implement their own practices
for good reason?

Leading into diversity

Changing perspectives™
